

**I support the 2013 Toxics Disclosure for Healthy Kids Act HB 3162. It's time for Oregon to take action on the chemicals of greatest concern to our health. Oregon should create a science-based list of high priority chemicals, require manufacturers of children's products to disclose the use of these chemicals to health authorities, and replace those chemicals with alternatives that do not harm our health or environment.**

Beth	Kapsch	bethkapsch@gmail.com	97217			2/21/13 14:23
Bethany	Waggoner	waggoner.bethany@gmail.com	97201	OR	Oregonians have a right to know what products are made of in order to make good choices for their young children and safeguard them from preventable health issues, like cancer or infertility, down the road. Disclosure is the first step in a process that will allow us to do so. I implore our elected officials to do right by the people you represent and put your support behind the 2013 Toxics Disclosure for Health Kids Act HB 3162!!!	2/21/13 14:33
Jason	Menke	jasonmenke@mac.com	97367	OR	I have more than enough concerns about toxic chemicals to strongly desire to remove as many as possible from my body. I'm particularly concerned with toxics in my three daughters bodies since their bodies are developing. It's not right!	2/21/13 15:06

LISA	SANCHEZ	VWBUSSS@AOL.COM	97123	OR	Why are toxins a great concern? Because they're toxic! They aren't called 'safe chemicals' or better yet if they were safe they wouldn't be called chemicals. If you had the option to choose chemical free v/s toxic chemicals for your children & loved ones which would you choose? Its a no brainer. Who would choose to poison their loved ones? Where there's alernatives to harmful products it is ludacris to even produce harmful products in the first place. Its infuriating! We shouldn't have to fight for this, it should be automatic law to eliminate toxins & penalize those that use them in products. For childrens sake end this stupidity.	2/21/13 15:18
Jared	Ishkanian	jaredi@oeonline.org	97215	OR	Please take this important step to protect children from toxic chemicals. Manufacturers need to be help accountable for their choices, and safe alternatives are readily available! Thanks-	2/21/13 17:31
Kelly	Campbell	kellyjcampbell@gmail.com	97214	OR		2/21/13 17:59
Bette	Moksnes-Koski	Bmoxie@comcast.net	97232		Heavy metals toxicity, autism, Alzheimer's in family - do not need metals in vaccines, no fluoride in drinking water!	2/21/13 18:36
Judith	Lienhard	lienjud@aol.com	97225	OR		2/21/13 18:52
Jenny	Holmes	jehrestore@gmail.com	97213	OR	Our bodies are temples of the Divine and exposures to toxics in everyday products threatens health, especially of the youngest and most vulnerable among us.	2/21/13 19:58
Joanne	Skirving	jmskirving@aol.com	97206	OR	I'm 12 years out from breast cancer. I don't want hormone-disrupting chemicals to increase my risk of breast cancer.	2/21/13 20:28

Darren	Campbell	darren@coldstreamcreative.com	97520	OR	I have two kids that I hope can become healthy adults and not suffer for the profit of others.	3/13/13 13:07
Laurel	Standley	laurel@clear-current.com	97007	OR	Toxic chemicals have no place in consumer products, particularly those used by children and women of child-bearing years. Passing this bill will shift commerce both here in Oregon and nationally toward reduced use of toxic chemicals in consumer goods.	3/13/13 13:24
Aireen	Gamus Joven	aireenjoven@gmail.com	97211	OR		3/13/13 15:14
Rachel	Schafer	Rdavisschafer@gmail.com	97206	OR		3/13/13 15:28
Lindsay	James	lcwiseman@yahoo.com	97211			3/13/13 15:41

					Please help protect our children from unnecessary toxic chemical exposure. Our families should not be exposed to dangerous elements that affect our health because of a lack of concern or lack of education by major consumer products corporations. The elimination of toxic chemicals in our consumer products would help decrease health insurance costs since it is the toxic chemicals in our products that are a major contributing factor to health complications in our children today. Thank you for your time and consideration. Please support the 2013 Toxics Disclosure for Healthy Kids Act HB 3162.
