Fire Fighters Council

April 23rd 2013

Dear Representative -

We urge your support for HB 3342. HB 3342, the Public Dollars Accountability Act, will keep public employers from spending money to either prompt or deter unions in their workplaces.

When employers weigh in while workers are considering forming a union it almost always creates stress in the workplace, and leaves workers who disagree with their employer's position - either in support or against forming a union - feeling uncomfortable at best and harassed at worst.

When public employers weigh in while workers are considering forming a union we see scarce public resources wasted and service delivery disrupted.

Before you is a simple solution: ensure that public employers are not weighing in, using our public resources to promote their personal opinions at the expense of the services they should be providing.

Please vote yes on HB 3342, the Public Dollars Accountability Act.
