

**C-Engrossed**  
**House Bill 2820**

Ordered by the Senate May 22  
Including House Amendments dated March 1 and April 24 and Senate  
Amendments dated May 22

Sponsored by COMMITTEE ON ENERGY AND ENVIRONMENT

**SUMMARY**

The following summary is not prepared by the sponsors of the measure and is not a part of the body thereof subject to consideration by the Legislative Assembly. It is an editor's brief statement of the essential features of the measure.

Modifies definition of "energy facility" for purposes of site certificates issued by Energy Facility Siting Council.

Declares emergency, effective on passage.

**A BILL FOR AN ACT**

1  
2 Relating to solar energy; creating new provisions; amending ORS 469.300; and declaring an emer-  
3 gency.

4 **Be It Enacted by the People of the State of Oregon:**

5 **SECTION 1.** ORS 469.300 is amended to read:

6 469.300. As used in ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and 469.992, unless the  
7 context requires otherwise:

8 (1) "Applicant" means any person who makes application for a site certificate in the manner  
9 provided in ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and 469.992.

10 (2) "Application" means a request for approval of a particular site or sites for the construction  
11 and operation of an energy facility or the construction and operation of an additional energy facility  
12 upon a site for which a certificate has already been issued, filed in accordance with the procedures  
13 established pursuant to ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and 469.992.

14 (3) "Associated transmission lines" means new transmission lines constructed to connect an en-  
15 ergy facility to the first point of junction of such transmission line or lines with either a power  
16 distribution system or an interconnected primary transmission system or both or to the Northwest  
17 Power Grid.

18 (4) "Average electric generating capacity" means the peak generating capacity of the facility  
19 divided by one of the following factors:

20 (a) For wind [*or solar energy*] facilities, 3.00;

21 (b) For geothermal energy facilities, 1.11; or

22 (c) For all other energy facilities, 1.00.

23 (5) "Combustion turbine power plant" means a thermal power plant consisting of one or more  
24 fuel-fired combustion turbines and any associated waste heat combined cycle generators.

25 (6) "Construction" means work performed on a site, excluding surveying, exploration or other  
26 activities to define or characterize the site, the cost of which exceeds \$250,000.

27 (7) "Council" means the Energy Facility Siting Council established under ORS 469.450.

**NOTE:** Matter in **boldfaced** type in an amended section is new; matter [*italic and bracketed*] is existing law to be omitted.  
New sections are in **boldfaced** type.

1 (8) "Department" means the State Department of Energy created under ORS 469.030.

2 (9) "Director" means the Director of the State Department of Energy appointed under ORS  
3 469.040.

4 (10) "Electric utility" means persons, regulated electrical companies, people's utility districts,  
5 joint operating agencies, electric cooperatives, municipalities or any combination thereof, engaged  
6 in or authorized to engage in the business of generating, supplying, transmitting or distributing  
7 electric energy.

8 (11)(a) "Energy facility" means any of the following:

9 (A) An electric power generating plant with a nominal electric generating capacity of 25 mega-  
10 watts or more, including but not limited to:

11 (i) Thermal power; *[or]*

12 (ii) Combustion turbine power plant[.]; **or**

13 **(iii) Solar thermal power plant.**

14 (B) A nuclear installation as defined in this section.

15 (C) A high voltage transmission line of more than 10 miles in length with a capacity of 230,000  
16 volts or more to be constructed in more than one city or county in this state, but excluding:

17 (i) Lines proposed for construction entirely within 500 feet of an existing corridor occupied by  
18 high voltage transmission lines with a capacity of 230,000 volts or more; and

19 (ii) Lines of 57,000 volts or more that are rebuilt and upgraded to 230,000 volts along the same  
20 right of way.

21 (D) A solar *[collecting]* **photovoltaic power generation** facility using more than *[100 acres of*  
22 *land.]*:

23 **(i) 100 acres located on high-value farmland as defined in ORS 195.300;**

24 **(ii) 100 acres located on land that is predominantly cultivated or that, if not cultivated,**  
25 **is predominantly composed of soils that are in capability classes I to IV, as specified by the**  
26 **National Cooperative Soil Survey operated by the Natural Resources Conservation Service**  
27 **of the United States Department of Agriculture; or**

28 **(iii) 320 acres located on any other land.**

29 (E) A pipeline that is:

30 (i) At least six inches in diameter, and five or more miles in length, used for the transportation  
31 of crude petroleum or a derivative thereof, liquefied natural gas, a geothermal energy form in a  
32 liquid state or other fossil energy resource, excluding a pipeline conveying natural or synthetic gas;

33 (ii) At least 16 inches in diameter, and five or more miles in length, used for the transportation  
34 of natural or synthetic gas, but excluding:

35 (I) A pipeline proposed for construction of which less than five miles of the pipeline is more than  
36 50 feet from a public road, as defined in ORS 368.001; or

37 (II) A parallel or upgraded pipeline up to 24 inches in diameter that is constructed within the  
38 same right of way as an existing 16-inch or larger pipeline that has a site certificate, if all studies  
39 and necessary mitigation conducted for the existing site certificate meet or are updated to meet  
40 current site certificate standards; or

41 (iii) At least 16 inches in diameter and five or more miles in length used to carry a geothermal  
42 energy form in a gaseous state but excluding a pipeline used to distribute heat within a geothermal  
43 heating district established under ORS chapter 523.

44 (F) A synthetic fuel plant which converts a natural resource including, but not limited to, coal  
45 or oil to a gas, liquid or solid product intended to be used as a fuel and capable of being burned to

1 produce the equivalent of two billion Btu of heat a day.

2 (G) A plant which converts biomass to a gas, liquid or solid product, or combination of such  
3 products, intended to be used as a fuel and if any one of such products is capable of being burned  
4 to produce the equivalent of six billion Btu of heat a day.

5 (H) A storage facility for liquefied natural gas constructed after September 29, 1991, that is de-  
6 signed to hold at least 70,000 gallons.

7 (I) A surface facility related to an underground gas storage reservoir that, at design injection  
8 or withdrawal rates, will receive or deliver more than 50 million cubic feet of natural or synthetic  
9 gas per day, or require more than 4,000 horsepower of natural gas compression to operate, but ex-  
10 cluding:

11 (i) The underground storage reservoir;

12 (ii) The injection, withdrawal or monitoring wells and individual wellhead equipment; and

13 (iii) An underground gas storage reservoir into which gas is injected solely for testing or res-  
14 ervoir maintenance purposes or to facilitate the secondary recovery of oil or other hydrocarbons.

15 (J) An electric power generating plant with an average electric generating capacity of 35  
16 megawatts or more if the power is produced from geothermal[, *solar*] or wind energy at a single  
17 energy facility or within a single energy generation area.

18 (b) "Energy facility" does not include a hydroelectric facility **or an energy facility under**  
19 **paragraph (a)(A)(iii) or (D) of this subsection that is established on the site of a decommis-**  
20 **sioned United States Air Force facility that has adequate transmission capacity to serve the**  
21 **energy facility.**

22 (12) "Energy generation area" means an area within which the effects of two or more small  
23 generating plants may accumulate so the small generating plants have effects of a magnitude similar  
24 to a single generating plant of 35 megawatts average electric generating capacity or more. An "en-  
25 ergy generation area" for facilities using a geothermal resource and covered by a unit agreement,  
26 as provided in ORS 522.405 to 522.545 or by federal law, shall be defined in that unit agreement. If  
27 no such unit agreement exists, an energy generation area for facilities using a geothermal resource  
28 shall be the area that is within two miles, measured from the electrical generating equipment of the  
29 facility, of an existing or proposed geothermal electric power generating plant, not including the site  
30 of any other such plant not owned or controlled by the same person.

31 (13) "Extraordinary nuclear occurrence" means any event causing a discharge or dispersal of  
32 source material, special nuclear material or by-product material as those terms are defined in ORS  
33 453.605, from its intended place of confinement off-site, or causing radiation levels off-site, that the  
34 United States Nuclear Regulatory Commission or its successor determines to be substantial and to  
35 have resulted in or to be likely to result in substantial damages to persons or property off-site.

36 (14) "Facility" means an energy facility together with any related or supporting facilities.

37 (15) "Geothermal reservoir" means an aquifer or aquifers containing a common geothermal fluid.

38 (16) "Local government" means a city or county.

39 (17) "Nominal electric generating capacity" means the maximum net electric power output of  
40 an energy facility based on the average temperature, barometric pressure and relative humidity at  
41 the site during the times of the year when the facility is intended to operate.

42 (18) "Nuclear incident" means any occurrence, including an extraordinary nuclear occurrence,  
43 that results in bodily injury, sickness, disease, death, loss of or damage to property or loss of use  
44 of property due to the radioactive, toxic, explosive or other hazardous properties of source material,  
45 special nuclear material or by-product material as those terms are defined in ORS 453.605.

1 (19) "Nuclear installation" means any power reactor, nuclear fuel fabrication plant, nuclear fuel  
2 reprocessing plant, waste disposal facility for radioactive waste, and any facility handling that  
3 quantity of fissionable materials sufficient to form a critical mass. "Nuclear installation" does not  
4 include any such facilities that are part of a thermal power plant.

5 (20) "Nuclear power plant" means an electrical or any other facility using nuclear energy with  
6 a nominal electric generating capacity of 25 megawatts or more, for generation and distribution of  
7 electricity, and associated transmission lines.

8 (21) "Person" means an individual, partnership, joint venture, private or public corporation, as-  
9 sociation, firm, public service company, political subdivision, municipal corporation, government  
10 agency, people's utility district, or any other entity, public or private, however organized.

11 (22) "Project order" means the order, including any amendments, issued by the State Department  
12 of Energy under ORS 469.330.

13 (23)(a) "Radioactive waste" means all material which is discarded, unwanted or has no present  
14 lawful economic use, and contains mined or refined naturally occurring isotopes, accelerator  
15 produced isotopes and by-product material, source material or special nuclear material as those  
16 terms are defined in ORS 453.605. The term does not include those radioactive materials identified  
17 in OAR 345-50-020, 345-50-025 and 345-50-035, adopted by the council on December 12, 1978, and re-  
18 vised periodically for the purpose of adding additional isotopes which are not referred to in OAR  
19 345-50 as presenting no significant danger to the public health and safety.

20 (b) Notwithstanding paragraph (a) of this subsection, "radioactive waste" does not include ura-  
21 nium mine overburden or uranium mill tailings, mill wastes or mill by-product materials as those  
22 terms are defined in Title 42, United States Code, section 2014, on June 25, 1979.

23 (24) "Related or supporting facilities" means any structure, proposed by the applicant, to be  
24 constructed or substantially modified in connection with the construction of an energy facility, in-  
25 cluding associated transmission lines, reservoirs, storage facilities, intake structures, road and rail  
26 access, pipelines, barge basins, office or public buildings, and commercial and industrial structures.  
27 "Related or supporting facilities" does not include geothermal or underground gas storage reser-  
28 voirs, production, injection or monitoring wells or wellhead equipment or pumps.

29 (25) "Site" means any proposed location of an energy facility and related or supporting facilities.

30 (26) "Site certificate" means the binding agreement between the State of Oregon and the appli-  
31 cant, authorizing the applicant to construct and operate a facility on an approved site, incorporating  
32 all conditions imposed by the council on the applicant.

33 (27) "Thermal power plant" means an electrical facility using any source of thermal energy with  
34 a nominal electric generating capacity of 25 megawatts or more, for generation and distribution of  
35 electricity, and associated transmission lines, including but not limited to a nuclear-fueled,  
36 geothermal-fueled or fossil-fueled power plant, but not including a portable power plant the principal  
37 use of which is to supply power in emergencies. "Thermal power plant" includes a nuclear-fueled  
38 thermal power plant that has ceased to operate.

39 (28) "Transportation" means the transport within the borders of the State of Oregon of radio-  
40 active material destined for or derived from any location.

41 (29) "Underground gas storage reservoir" means any subsurface sand, strata, formation, aquifer,  
42 cavern or void, whether natural or artificially created, suitable for the injection, storage and with-  
43 drawal of natural gas or other gaseous substances. "Underground gas storage reservoir" includes a  
44 pool as defined in ORS 520.005.

45 (30) "Utility" includes:

1 (a) A person, a regulated electrical company, a people's utility district, a joint operating agency,  
2 an electric cooperative, municipality or any combination thereof, engaged in or authorized to engage  
3 in the business of generating, transmitting or distributing electric energy;

4 (b) A person or public agency generating electric energy from an energy facility for its own  
5 consumption; and

6 (c) A person engaged in this state in the transmission or distribution of natural or synthetic gas.

7 (31) "Waste disposal facility" means a geographical site in or upon which radioactive waste is  
8 held or placed but does not include a site at which radioactive waste used or generated pursuant  
9 to a license granted under ORS 453.635 is stored temporarily, a site of a thermal power plant used  
10 for the temporary storage of radioactive waste from that plant for which a site certificate has been  
11 issued pursuant to this chapter or a site used for temporary storage of radioactive waste from a  
12 reactor operated by a college, university or graduate center for research purposes and not con-  
13 nected to the Northwest Power Grid. As used in this subsection, "temporary storage" includes  
14 storage of radioactive waste on the site of a nuclear-fueled thermal power plant for which a site  
15 certificate has been issued until a permanent storage site is available by the federal government.

16 **SECTION 2. The amendments to ORS 469.300 by section 1 of this 2013 Act apply to notices**  
17 **of intent to file an application for a site certificate under ORS 469.330 that are submitted to**  
18 **the Energy Facility Siting Council on or after the effective date of this 2013 Act.**

19 **SECTION 3. This 2013 Act being necessary for the immediate preservation of the public**  
20 **peace, health and safety, an emergency is declared to exist, and this 2013 Act takes effect**  
21 **on its passage.**

22
