A-Engrossed Senate Bill 401

Ordered by the Senate April 22 Including Senate Amendments dated April 22

Sponsored by Senator BATES; Senator HASS (Presession filed.)

SUMMARY

The following summary is not prepared by the sponsors of the measure and is not a part of the body thereof subject to consideration by the Legislative Assembly. It is an editor's brief statement of the essential features of the measure.

[Designates certain rivers and creeks as scenic waterways.]

Prohibits mining using motorized equipment in scenic waterways.

Requires State Parks and Recreation Department to undertake study of certain waterways for consideration as scenic waterways. Requires department to report to Governor and Legislative Assembly.

Declares emergency, effective on passage.

A BILL FOR AN ACT

2 Relating to scenic waterways; creating new provisions; amending ORS 390.835; repealing sections 3

3 and 4, chapter 499, Oregon Laws 2001; and declaring an emergency.

4 Be It Enacted by the People of the State of Oregon:

5 **SECTION 1.** ORS 390.835 is amended to read:

390.835. (1) It is declared that the highest and best uses of the waters within scenic waterways 6 are recreation, fish and wildlife uses. The free-flowing character of these waters shall be maintained 7 in quantities necessary for recreation, fish and wildlife uses. No dam, or reservoir, or other water 8 impoundment facility shall be constructed on waters within scenic waterways. No water diversion 9 facility shall be constructed or used except by right previously established or as permitted by the 10 Water Resources Commission, upon a finding that such diversion is necessary to uses designated in 11 ORS 536.310 (12), and in a manner consistent with the policies set forth under ORS 390.805 to 12 390.925. The Water Resources Commission shall administer and enforce the provisions of this sub-13 section. 14

(2) Filling of the beds or removal of material from or other alteration of the beds or banks of 15scenic waterways for purposes other than recreational prospecting not requiring a permit shall be 16 17 prohibited, except as permitted by the Director of the Department of State Lands upon a finding that such activity would be consistent with the policies set forth under ORS 390.805 to 390.925 for scenic 18 waterways and in a manner consistent with the policies set forth under ORS 196.800 to 196.825 and 19 20 196.845 to 196.870 for removal of material from the beds and banks and filling of any waters of this state. The Director of the Department of State Lands shall administer and enforce the provisions 2122of this subsection.

(3)(a) Upon a finding of emergency circumstances, the Director of the Department of State Lands
may issue a temporary permit for the removal, filling or alteration of the beds or banks within a
scenic waterway. The temporary permit shall include conditions developed after consultation with
the State Department of Fish and Wildlife and the State Parks and Recreation Department.

1

1 (b) As used in this subsection, "emergency circumstances" exist if prompt action is necessary 2 to prevent irreparable harm, injury or damage to persons or property.

3 (4) Any person adversely affected or aggrieved by the grant or denial of a permit under sub4 section (2) or (3) of this section may appeal in accordance with the procedure set forth in ORS
5 196.835.

6 (5) Nothing in ORS 390.805 to 390.925 affects the authority of the State Fish and Wildlife Com-7 mission to construct facilities or make improvements to facilitate the passage or propagation of fish 8 or to exercise other responsibilities in managing fish and wildlife resources. Nothing in ORS 390.805 9 to 390.925 affects the authority of the Water Resources Commission to construct and maintain 10 stream gauge stations and other facilities related to the commission's duties in administration of the 11 water laws.

(6) Upon a finding of necessity under subsection (1) of this section, the Water Resources Commission may issue a water right for human consumption not to exceed 0.005 cubic feet per second per household, or livestock consumption uses not to exceed one-tenth of one cubic foot per second per 1,000 head of livestock, as designated in ORS 536.310 (12) within or above a scenic waterway if the Water Resources Commission makes the following findings:

(a) That issuing the water right does not significantly impair the free-flowing character of these
 waters in quantities necessary for recreation, fish and wildlife.

(b) That issuing the water right is consistent with provisions pertaining to water appropriation
 and water rights under ORS chapters 536 and 537 and rules adopted thereunder.

(c) That construction, operation and maintenance of the diversion system will be carried out in
 a manner consistent with the purposes set forth in ORS 390.805 to 390.925.

23 (d) If the water right is for human consumption, an additional finding that:

24 (A) The applicant cannot reasonably obtain water from any other source;

(B) Denial of the water right would result in loss of reasonable expectations for use of theproperty; and

(C) The system installed to divert water shall include monitoring equipment to permit water usemeasurement and reporting.

29 (e) If the water right is for livestock consumption, an additional finding that:

30 (A) The right is necessary to prevent the livestock from watering in or along the stream bed;

31 (B) The applicant cannot reasonably obtain water from any other source; and

32 (C) The applicant has excluded livestock from the stream and its adjacent riparian zone.

(7) In making the findings required under subsection (6) of this section, the Water Resources
 Commission shall consider the existing or potential cumulative impacts of issuing the water right.

(8) The Water Resources Commission may not allow human consumption and livestock uses authorized under subsection (6) of this section in excess of a combined cumulative total of one percent
of the average daily flow or one cubic foot per second, whichever is less, unless:

(a) The Water Resources Commission, the State Parks and Recreation Department, the State
 Department of Fish and Wildlife, the Department of Environmental Quality and the Department of
 State Lands unanimously agree to exceed that amount; and

(b) Exceeding that amount will not significantly impair the free-flowing character of these wa ters in quantities necessary for recreation, fish and wildlife.

(9)(a) The provisions of this section shall not apply to a water right application for the use of
ground water as defined in ORS 537.515, except upon a finding by the Water Resources Director
based on a preponderance of evidence that the use of ground water will measurably reduce the

[2]

1 surface water flows necessary to maintain the free-flowing character of a scenic waterway in quan-

2 tities necessary for recreation, fish and wildlife.

(b) The Water Resources Department shall review every application for the use of ground water
to determine whether to make the finding specified in paragraph (a) of this subsection. The finding
shall be based upon the application of generally accepted hydrogeologic methods using relevant and
available field information concerning the proposed use.

7 (c) In making the determination required by paragraph (a) of this subsection, the Water Re-8 sources Department shall consider the timing of projected impacts of the proposed use in relation 9 to other factors, including but not limited to: Changing climate, recharge, incidental precipitation, 10 out-of-stream appropriations and return flows.

(d) If the Water Resources Director makes the finding specified in paragraph (a) of this sub section, the Water Resources Director shall issue an order denying the application unless:

13 (A) Mitigation is provided in accordance with subsection (10) of this section; or

(B) The applicant submits evidence to overcome the finding under paragraph (a) of this sub-section.

(e) Except as provided under subsection (13) of this section, if the Water Resources Director
does not make the finding specified in paragraph (a) of this subsection, the Water Resources Director shall issue an order approving the application if the application otherwise meets the requirements of ORS 537.505 to 537.795.

20 (f) A protest of any order issued under this subsection may be filed in the same manner as a 21 protest on any application for a right to appropriate ground water.

(g) Each water right permit and certificate for appropriation of ground water issued after July 19, 1995, for which a source of appropriation is within or above a scenic waterway shall be conditioned to allow the regulation of the use if analysis of data available after the permit or certificate is issued discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced.

(h) Nothing in this subsection shall limit the use of ground water for a use exempted under ORS
 537.545.

(10) The Water Resources Commission or Water Resources Director shall consider mitigation measures and may include mitigation measures as conditions in any water right permit or certificate to ensure the maintenance of the free-flowing character of the scenic waterway in quantities necessary for recreation, fish and wildlife.

(11) The Water Resources Commission and the Water Resources Director shall carry out their responsibilities under ORS 536.220 to 536.590 with respect to the waters within scenic waterways in conformity with the provisions of this section.

(12) As used in this section, "measurably reduce" means that the use authorized under subsection (9) of this section will individually or cumulatively reduce surface water flows within the scenic waterway in excess of a combined cumulative total of one percent of the average daily flow or one cubic foot per second, whichever is less, unless:

(a) The Water Resources Department, the State Parks and Recreation Department, the State
Department of Fish and Wildlife, the Department of Environmental Quality and the Department of
State Lands unanimously agree to exceed that amount; and

45 (b) Exceeding that amount will not significantly impair the free-flowing character of these wa-

1 ters in quantities necessary for recreation, fish and wildlife.

2 (13) Before authorizing an appropriation that will reduce streamflows within a scenic waterway

3 in amounts up to but not exceeding the amounts described in subsection (12) of this section, the

4 Water Resources Director shall find:

(a) That the appropriation will not significantly impair the free-flowing character of these waters
in quantities necessary for recreation, fish and wildlife.

7 (b) That the appropriation is consistent with provisions pertaining to water appropriations and 8 water rights under ORS chapters 536 and 537 and the rules adopted thereunder.

9 (c) That construction, operation and maintenance of the appropriation will be carried out in a 10 manner consistent with the purposes set forth in ORS 390.805 to 390.925.

(14) No placer mining shall be permitted on waters within scenic waterways other than recre-ational placer mining.

(15) No person shall be required to obtain a permit for recreational prospecting resulting in the fill, removal or other alteration of less than one cubic yard of material at any one individual site and, cumulatively, not more than five cubic yards of material from within the bed or wet perimeter of any single scenic waterway in a single year. Recreational prospecting shall not occur at any site where fish eggs are present.

(16) No provision of this section shall be construed to exempt recreational placer mining on a scenic waterway, other than recreational prospecting not requiring a permit, from compliance with the provisions of ORS 196.800 to 196.825 and 196.845 to 196.870 or rules adopted pursuant to ORS 196.800 to 196.825 and 196.845 to 196.870.

(17) Recreational placer mining, other than recreational prospecting not requiring a permit,shall not:

24 (a) Dam or divert a waterway or obstruct fish passage;

(b) Include nozzling, sluicing or digging outside the wet perimeter of the stream, nor extend the
 wet perimeter;

(c) Include movement of boulders, logs, stumps or other woody material from the wet perimeter
 other than movement by hand and nonmotorized equipment;

(d) Involve the disturbance of rooted or embedded woody plants, including trees and shrubs, re gardless of their location;

31 (e) Include excavation from the streambank;

(f) Fail to level pits, piles, furrows or potholes outside the main channel of the waterway upon
 leaving the site;

[(g) Include operation of a suction dredge without a suction dredge waste discharge permit from
the Department of Environmental Quality including, but not limited to, a prohibition against dredging
during periods when fish eggs could be in the dredging site gravel;]

37 [(h)] (g) Be conducted on federal lands except as allowed by agencies of the federal government;
 38 or

[(i)] (h) Impede boating.[;]

39

[(j) Include operation of a dredge between the hours of 6 p.m. and 8 a.m. within 500 feet of a residence or within 500 feet of a campground except within a federally designated recreational mining site;
or]

43 [(k) Include operation of a dredge within the marked or posted swimming area of a designated
 44 campground or day use area except within a federally designated recreational mining site.]

45 (18) As used in this section:

1 (a) "Bed" means the land within the wet perimeter and any adjacent nonvegetated dry gravel 2 bar.

3 (b) "Prospecting" means to search or explore for samples of gold, silver or other precious min-4 erals, using nonmotorized methods, from among small quantities of aggregate.

5 (c)(A) "Recreational placer mining" [includes, but is not limited to, the use of] means mining 6 using nonmotorized equipment [and motorized surface dredges having an intake nozzle with an inside 7 diameter not exceeding four inches, a motor no larger than 16 horsepower and a muffler meeting or 8 exceeding factory-installed noise reduction standards].

9 (B) "Recreational placer mining" does not [*include*] mean recreational prospecting that does
 10 not require a permit.

(d) "Wet perimeter" means the area of the stream that is underwater, or is exposed as a nonvegetated dry gravel bar island surrounded on all sides by actively moving water at the time the activity occurs.

14 **SECTION 2.** ORS 390.835, as amended by section 8, chapter 516, Oregon Laws 2001, is amended 15 to read:

16390.835. (1) It is declared that the highest and best uses of the waters within scenic waterways are recreation, fish and wildlife uses. The free-flowing character of these waters shall be maintained 17 in quantities necessary for recreation, fish and wildlife uses. A dam, reservoir or other water 18 impoundment facility may not be constructed on waters within scenic waterways. A water diversion 19 20facility may not be constructed or used except by right previously established or as permitted by the Water Resources Commission, upon a finding that such diversion is necessary to uses designated in 2122ORS 536.310 (12), and in a manner consistent with the policies set forth under ORS 390.805 to 23390.925. The Water Resources Commission shall administer and enforce the provisions of this subsection. 24

25(2) Filling of the beds or removal of material from or other alteration of the beds or banks of scenic waterways for purposes other than recreational prospecting not requiring a permit shall be 2627prohibited, except as permitted by the Director of the Department of State Lands upon a finding that such activity would be consistent with the policies set forth under ORS 390.805 to 390.925 for scenic 28waterways and in a manner consistent with the policies set forth under ORS 196.800 to 196.825 and 2930 196.845 to 196.870 for removal of material from the beds and banks and filling of any waters of this 31 state. The Director of the Department of State Lands shall administer and enforce the provisions of this subsection. 32

(3)(a) Upon a finding of emergency circumstances, the Director of the Department of State Lands
 may issue a temporary permit for the removal, filling or alteration of the beds or banks within a
 scenic waterway. The temporary permit shall include conditions developed after consultation with
 the State Department of Fish and Wildlife and the State Parks and Recreation Department.

(b) As used in this subsection, "emergency circumstances" exist if prompt action is necessary
 to prevent irreparable harm, injury or damage to persons or property.

(4) Any person adversely affected or aggrieved by the grant or denial of a permit under subsection (2) or (3) of this section may appeal in accordance with the procedure set forth in ORS
196.835.

(5) Nothing in ORS 390.805 to 390.925 affects the authority of the State Fish and Wildlife Commission to construct facilities or make improvements to facilitate the passage or propagation of fish
or to exercise other responsibilities in managing fish and wildlife resources. Nothing in ORS 390.805
to 390.925 affects the authority of the Water Resources Commission to construct and maintain

[5]

stream gauge stations and other facilities related to the commission's duties in administration of the 1 2 water laws. (6) Upon a finding of necessity under subsection (1) of this section, the Water Resources Com-3 mission may issue a water right for human consumption not to exceed 0.005 cubic feet per second 4 per household, or livestock consumption uses not to exceed one-tenth of one cubic foot per second $\mathbf{5}$ per 1,000 head of livestock, as designated in ORS 536.310 (12) within or above a scenic waterway if 6 the Water Resources Commission makes the following findings: 7 8 (a) That issuing the water right does not significantly impair the free-flowing character of these 9 waters in quantities necessary for recreation, fish and wildlife. 10 (b) That issuing the water right is consistent with provisions pertaining to water appropriation and water rights under ORS chapters 536 and 537 and rules adopted thereunder. 11 12 (c) That construction, operation and maintenance of the diversion system will be carried out in a manner consistent with the purposes set forth in ORS 390.805 to 390.925. 13(d) If the water right is for human consumption, an additional finding that: 14 15(A) The applicant cannot reasonably obtain water from any other source; (B) Denial of the water right would result in loss of reasonable expectations for use of the 16 property; and 1718 (C) The system installed to divert water shall include monitoring equipment to permit water use measurement and reporting. 19 20(e) If the water right is for livestock consumption, an additional finding that: (A) The right is necessary to prevent the livestock from watering in or along the stream bed; 2122(B) The applicant cannot reasonably obtain water from any other source; and 23(C) The applicant has excluded livestock from the stream and its adjacent riparian zone. (7) In making the findings required under subsection (6) of this section, the Water Resources 24Commission shall consider the existing or potential cumulative impacts of issuing the water right. 25(8) The Water Resources Commission may not allow human consumption and livestock uses au-2627thorized under subsection (6) of this section in excess of a combined cumulative total of one percent of the average daily flow or one cubic foot per second, whichever is less, unless: 28(a) The Water Resources Commission, the State Parks and Recreation Department, the State 2930 Department of Fish and Wildlife, the Department of Environmental Quality and the Department of 31 State Lands unanimously agree to exceed that amount; and (b) Exceeding that amount will not significantly impair the free-flowing character of these wa-32ters in quantities necessary for recreation, fish and wildlife. 33 34 (9)(a) The provisions of this section do not apply to a water right application for the use of ground water as defined in ORS 537.515, except upon a finding by the Water Resources Director 35 based on a preponderance of evidence that the use of ground water will measurably reduce the 36 37 surface water flows necessary to maintain the free-flowing character of a scenic waterway in quan-38 tities necessary for recreation, fish and wildlife. (b) The Water Resources Department shall review every application for the use of ground water 39 to determine whether to make the finding specified in paragraph (a) of this subsection. The finding 40 shall be based upon the application of generally accepted hydrogeologic methods using relevant and 41 available field information concerning the proposed use. 42(c) In making the determination required by paragraph (a) of this subsection, the Water Re-43

43 (c) in making the determination required by paragraph (a) of this subsection, the water Re 44 sources Department shall consider the timing of projected impacts of the proposed use in relation
 45 to other factors, including but not limited to: Changing climate, recharge, incidental precipitation,

1 out-of-stream appropriations and return flows.

2 (d) If the Water Resources Director makes the finding specified in paragraph (a) of this sub-3 section, the Water Resources Director shall issue an order denying the application unless:

4 (A) Mitigation is provided in accordance with subsection (10) of this section; or

5 (B) The applicant submits evidence to overcome the finding under paragraph (a) of this sub-6 section.

7 (e) Except as provided under subsection (13) of this section, if the Water Resources Director 8 does not make the finding specified in paragraph (a) of this subsection, the Water Resources Direc-9 tor shall issue an order approving the application if the application otherwise meets the require-10 ments of ORS 537.505 to 537.795.

(f) A protest of any order issued under this subsection may be filed in the same manner as a protest on any application for a right to appropriate ground water.

(g) Each water right permit and certificate for appropriation of ground water issued after July 19, 1995, for which a source of appropriation is within or above a scenic waterway shall be conditioned to allow the regulation of the use if analysis of data available after the permit or certificate is issued discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced.

20 (h) This subsection does not limit the use of ground water for a use exempted under ORS 21 537.545.

(10) The Water Resources Commission or Water Resources Director shall consider mitigation measures and may include mitigation measures as conditions in any water right permit or certificate to ensure the maintenance of the free-flowing character of the scenic waterway in quantities necessary for recreation, fish and wildlife.

(11) The Water Resources Commission and the Water Resources Director shall carry out their responsibilities under ORS 536.220 to 536.590 with respect to the waters within scenic waterways in conformity with the provisions of this section.

(12) As used in this section, "measurably reduce" means that the use authorized under subsection (9) of this section will individually or cumulatively reduce surface water flows within the scenic waterway in excess of a combined cumulative total of one percent of the average daily flow or one cubic foot per second, whichever is less, unless:

(a) The Water Resources Department, the State Parks and Recreation Department, the State
 Department of Fish and Wildlife, the Department of Environmental Quality and the Department of
 State Lands unanimously agree to exceed that amount; and

(b) Exceeding that amount will not significantly impair the free-flowing character of these wa ters in quantities necessary for recreation, fish and wildlife.

(13) Before authorizing an appropriation that will reduce streamflows within a scenic waterway
in amounts up to but not exceeding the amounts described in subsection (12) of this section, the
Water Resources Director shall find:

(a) That the appropriation will not significantly impair the free-flowing character of these waters
 in quantities necessary for recreation, fish and wildlife.

(b) That the appropriation is consistent with provisions pertaining to water appropriations and
 water rights under ORS chapters 536 and 537 and the rules adopted thereunder.

45 (c) That construction, operation and maintenance of the appropriation will be carried out in a

1 manner consistent with the purposes set forth in ORS 390.805 to 390.925.

2 (14) Placer mining is not permitted on waters within scenic waterways, other than recreational 3 placer mining.

4 (15) A person may not be required to obtain a permit for recreational prospecting or other 5 nonmotorized recreational activity resulting in the fill, removal or other alteration of less than one 6 cubic yard of material at any one individual site and, cumulatively, not more than five cubic yards 7 of material from within the bed or wet perimeter of any single scenic waterway in a single year. 8 Recreational prospecting shall not occur at any site where fish eggs are present.

9 (16) This section does not exempt recreational placer mining on a scenic waterway, other than 10 recreational prospecting not requiring a permit, from compliance with the provisions of ORS 196.800 11 to 196.825 and 196.845 to 196.870 or rules adopted pursuant to ORS 196.800 to 196.825 and 196.845 12 to 196.870.

13 (17) Recreational placer mining may not:

14 (a) Dam or divert a waterway or obstruct fish passage;

(b) Include nozzling, sluicing or digging outside the wet perimeter of the stream, nor extend the
 wet perimeter;

(c) Include movement of boulders, logs, stumps or other woody material from the wet perimeter
 other than movement by hand and nonmotorized equipment;

(d) Involve the disturbance of rooted or embedded woody plants, including trees and shrubs, re-gardless of their location;

(e) Include excavation from the streambank;

(f) Fail to level pits, piles, furrows or potholes outside the main channel of the waterway upon
 leaving the site;

[(g) Include operation of a suction dredge without a suction dredge waste discharge permit from the Department of Environmental Quality including, but not limited to, a prohibition against dredging during periods when fish eggs could be in the dredging site gravel;]

[(h)] (g) Be conducted on federal lands except as allowed by agencies of the federal government;
or

29 [(*i*)] (**h**) Impede boating.[;]

21

[(j) Include operation of a dredge between the hours of 6 p.m. and 8 a.m. within 500 feet of a res idence or within 500 feet of a campground except within a federally designated recreational mining site;
 or]

[(k) Include operation of a dredge within the marked or posted swimming area of a designated
 campground or day use area except within a federally designated recreational mining site.]

35 (18) As used in this section:

(a) "Bed" means the land within the wet perimeter and any adjacent nonvegetated dry gravelbar.

(b) "Prospecting" means to search or explore for samples of gold, silver or other precious min erals, using nonmotorized methods, from among small quantities of aggregate.

40 (c)(A) "Recreational placer mining" [includes, but is not limited to, the use of] means mining
41 using nonmotorized equipment [and motorized surface dredges having an intake nozzle with an inside
42 diameter not exceeding four inches, a motor no larger than 16 horsepower and a muffler meeting or
43 exceeding factory-installed noise reduction standards].

44 (B) "Recreational placer mining" does not [include] mean recreational prospecting that does
 45 not require a permit.

(d) "Wet perimeter" means the area of the stream that is underwater, or is exposed as a non-1 vegetated dry gravel bar island surrounded on all sides by actively moving water at the time the 2 activity occurs. 3 SECTION 3. Sections 3 and 4, chapter 499, Oregon Laws 2001, are repealed. 4 SECTION 4. (1) In order to achieve compliance with ORS 390.855 related to scenic 5 waterways, the State Parks and Recreation Department shall undertake a study of the fol-6 lowing waterways for consideration under the provisions of ORS 390.805 to 390.925 as scenic 7 waterways: 8 9 (a) The McKenzie River from Paradise Campground downstream to its confluence with **Cone Creek.** 10 (b) The Illinois River from the boundary of the Rogue River-Siskiyou National Forest in 11 12section 29, township 38 south, range 8 west, downstream to its confluence with Deer Creek. (c) The East Fork Illinois River from the Oregon border with California downstream to 13 its confluence with the Illinois River. 14 (d) The West Fork Illinois River from the Oregon border with California downstream to 15 its confluence with Rough and Ready Creek. 16 (e) The Rogue River from its confluence with Bear Creek downstream to the confluence 17 of Bear Creek with Applegate River. 18 (f) The Grande Ronde River from its headwaters to the boundary of Wallowa-Whitman 19 National Forest in section 15, township 4 south, range 35 east. 20(g) The Middle Fork Willamette River from Timpanogas Lake downstream to Hills Creek 2122Lake. 23(h) The Brice Creek Scenic Waterway, which includes Brice Creek from its headwaters to Row River. 24(i) The South Umpqua Scenic Waterway, which includes the South Umpqua River from 25Castle Rock Fork downstream to the Highway 42 bridge. 2627(j) The Sucker Scenic Waterway, which includes Sucker Creek from its headwaters to its confluence with the East Fork Illinois River. 28(k) The Yachats Scenic Waterway, which includes the Yachats River from its headwaters 2930 to the Pacific Ocean. 31 (L) The Applegate Scenic Waterway, which includes the Applegate River from immediately below Applegate Lake to the confluence of the Applegate River with Forest Creek. 32(m) The Briggs Creek Scenic Waterway, which includes Briggs Creek from its headwaters 33 34 to its confluence with the Illinois River. 35 (n) The Cedar Creek Scenic Waterway, which includes Cedar Creek from its headwaters 36 to its confluence with the Little North Fork Santiam River. 37 (o) The Chetco Scenic Waterway, which includes the segment of the Chetco River from the Kalmiopsis Wilderness boundary in section 5, township 38 south, range 11 west, down-38 stream to the United States Forest Service boundary below Wilson Creek. 39 (p) The Cow Creek Scenic Waterway, which includes Cow Creek from Tunnel Creek 40 downstream to the confluence of Cow Creek with the South Umpqua River. 41 (q) The Eagle Creek Scenic Waterway, which includes Eagle Creek from its headwaters 42in the Eagle Cap Wilderness downstream to the United States Forest Service boundary in 43 section 7, township 8 south, range 45 east. 44 (r) The Elk Creek Scenic Waterway, which includes Elk Creek from its headwaters to its 45

confluence with the South Umpqua River. 1 2 (s) The Grave Creek Scenic Waterway, which includes Grave Creek from its headwaters downstream to its confluence with the Rogue River. 3 (t) The Silver Creek Scenic Waterway, which includes: 4 (A) Silver Creek from its headwaters to its confluence with the Illinois River; 5 (B) The North Fork Silver Creek from its headwaters to its confluence with Silver Creek; 6 and 7 8 (C) The South Fork Silver Creek from its headwaters to its confluence with Silver Creek. 9 (u) The Josephine Creek Scenic Waterway, which includes Josephine Creek from its headwaters to its confluence with the Illinois River. 10 (v) The Little Applegate Scenic Waterway, which includes the Little Applegate River from 11 12 its headwaters to its confluence with the Applegate River. (w) The Molalla River Scenic Waterway, which includes the Molalla River from the Bu-13 reau of Land Management boundary in section 19, township 7 south, range 4 east, down-14 stream to the Bureau of Land Management boundary in section 7, township 6 south, range 15 3 east. 16 (x) The Quartzville Scenic Waterway, which includes Quartzville Creek from its 17 headwaters to Green Peter Lake. 18 (y) The Rough and Ready Scenic Waterway, which includes: 19 (A) The Rough and Ready Creek from the confluence at the north and south forks of the 20Rough and Ready Creek downstream to its confluence with the West Fork Illinois River; 2122(B) The North Fork Rough and Ready Creek from its headwaters to its confluence with the South Fork Rough and Ready Creek; and 23(C) The South Fork Rough and Ready Creek from its headwaters downstream to its 24confluence with the North Fork Rough and Ready Creek. 25(z) The Sandy Scenic Waterway, which includes the Sandy River from the Mount Hood 2627Wilderness boundary downstream to its confluence with the Bull Run River. (aa) The South Fork Alsea Scenic Waterway, which includes the South Fork Alsea River 28from its headwaters to its confluence with the North Fork Alsea River. 2930 (2) The State Parks and Recreation Department shall report the results of the study to 31 the Governor and the interim committees of the Legislative Assembly related to environment and natural resources on or before January 1, 2015.
