Subject: No Matter what the Cost do NOT sell us out!!!

THat is my message for everyone in special session today, No Matter what the Cost do NOT sell us out!!! If it takes trashing everything else so be it we can recover in our schools from funding cuts this will go on the same with budget shortfalls al part of the same old same old every year but what we cannot survive is the cheap sale of our agricultural rights to the interested of OTHERS. If it weren't others there would be no point in blocking self rule of counties. You are looking to destroy the agricultural heritage and integrity of an entire state, this is true Folly no great hero story ending on this one , irreversible damage and its time to stop this train to destruction and everyone knows it, act on That truth and come home at peace with yourselves that you have done a great right today.

In peace in honor and love , do what is right for the land and for the people.
Julie
