

Dear Senator Beyer and Members of the Committee,

We have demonstrated our support for solar energy and the industry it supports through development of solar arrays on City facilities and support for commercial and residential solar installations. We believe that SB 1520 would substantially help Oregonians to continue to expand solar energy by supporting collaborative solar developments. This bill would help broaden access to solar energy, which supports our local and state economy and the environment. I encourage you to support this bill.

Regards,

Peter Brandom | *Project Manager II - Sustainability*
