

Dear Senator Brennan,

I have worked with many groups from churches to schools that would like to put together community solar projects. The paper work is quite daunting and this has stopped many efforts. I am glad to see that efforts are being made to simplify and improve the process.

Please let me know how this legislation is proceeding. If there are any technical issues that arise, let me know if I can help.

I think it is great that the state is finally helping community members work together to establish solar energy projects.

Respectfully yours,

Frank Vignola
