

Good Morning Patrick,

My name is Julie Williams. I am a teacher in Corvallis, Oregon. I have been trying to get solar on our schools since 2002! I have also attempted Community Solar projects in Corvallis for a number of years. The numbers and "rules of engagement" have been a constant deterrent to success. I am excited to hear that you support Senate Bill 1520. It will create a great deal of energy for renewable energy in Oregon.

Please let me know if there is anything I can do to help this Bill come to pass>

Blessings, Julie Williams
