

Please distribute to all Representatives. Thank you

I am a 5yr Vaper, RN, and single mom. I have vaped (used an ecig) to quit a 20+ year smoking habit. I would like to work with you as a community partner to support the grass roots movement that is vaping. We have done more than the surgeon general has the last 50 yrs in the anti-tobacco campaign. We are anti tobacco as well. We do not like that the tobacco companies have leached onto this evolving, technology the PEOPLE developed through gathering by social media and vape meets to develop. Please see the science and not the sensationalism and mis information many with greater budgets than us in the media. While we met last week to testify for yes on HB4073 and no on the too restrictive and criminalizing HB4115 in Seattle an anti-tobacco convention of scientists, politicians, lobbyists, the ACA, ALA etc met... this research was presented and many felt there is a disservice being done to the public by 1. Not promoting vaping as cessation and 2. Putting in any category similar to cigarettes, because a mist appears like smoke. Among others.

Thank you for your passion and service to Oregon. I will be at the hearing in Salem today on work sessions for HB4115 which Oregon vapers oppose.

Attached link for above mentioned research is below, please submit for supplemental testimony.

Thank you, Tomi Deveraux
