

February 11, 2014

Sir,

I would urge you to not support this project. I live in Vancouver Washington and do not think light rail is needed on this side of the river. Our population is spread out to widely for light rail to be efficient. It will decimate downtown Vancouver for years during the construction phase. Besides that, after listening to the discrepancies uncovered by the forensic audits and the mostly false figures presented by the CRC project representatives I think there's better options to be studied for less cost. Where has \$190 Million Dollars gone without turning a shovel on this project? I truly believe before we replace the Interstate bridge we should build a third bridge located somewhere near Fairview.

Thanks for your consideration,

William A. Hauser
