

Please provide this email to the members of the Senate Judiciary Committee re: SB 1550.

The Oregon District Attorneys Association has approved the following language for use when a bill has the potential for significant sentencing changes.

"ODAA sees this bill as having the potential for significant sentencing changes and therefore taking a position of support or opposition would violate the agreement we made in the overall negotiations that resulted in the final version of HB 3194 from the 2013 session. We are happy to provide technical assistance or answer questions on this bill, but we are abiding by our promise to not support or oppose any bill with the potential for significant sentencing changes."

Thank you,

Doug
