

I request that you vote NO on HB 4115 because it would ban smoke-free e-cigarette use wherever smoking is prohibited. After smoking for over 40 yrs and trying unsuccessfully to quit using patches, gum, etc. I decided to try e-cigs, well guess what? I am now over the 2 yr mark being smoke free! I truly believe e-cigs saved my life. I have more energy and breath easier. I have introduced many of my smoking friends to e-cigs and they are always thanking me for doing so. If this bill passes it will do much harm to the health of many who may return to smoking since the added incentive of freely vaping an e-cig will be taken away and the stigma that vaping is the same as smoking, which it is not....
