

Dear Representative Doherty and Members of the Committee,

SB 1520 would provide a means for people in Historic Districts (such as myself), where solar panels are not allowed, to form a community renewable energy cooperative. There is some sunny open land at the nearby elementary school that would be perfect, providing a teaching moment, as well as, solar power for our Historic District. Please support SB 1520. Thank you.

Sincerely,
Paul Ahrens
Corvallis, OR
