**Subject:** Sprague River

I just found out our friends' well is on list with others to be shut down this summer in Klamath Falls. Sen Whitsett proposing HR 4044 that will require state to PROVE private wells have impact on Sprague River BEFORE they can be shut off.

The people want SCIENCE behind arbitrary rulings which aren't following 9th Circuit Court rulings.

### PLEASE HELP

Without a well these good farmers lose everything; cows, hay, their family gardens, their property becomes only useless uninhabitable high desert without water and their toil.

They live the dream of fresh, local, sustainability, help them continue.

HR 4044.

Thank you,  
Jennifer Kem
