**Subject:** HB 4044

Dear Ms. Patrino,

I cannot attend the meeting scheduled for this Thursday in Salem as we are very busy at our ranch during this time of year.

With that said, I want to convey that if this HB 4044 bill is not passed and the well subsequently shut off at our ranch operation, it would constitute a financial hardship of untold proportions upon our ability to make a living in the farming and ranching business. There are hundreds of other self-employed ranchers and farmers that would simply cease to exist if their wells were shut off for some convoluted theory being espoused by radical bureaucratic individuals who have no other agenda but to intentionally interfere with the private property rights guaranteed to them by the US Constitution.

There will be a significant Blow Back if these wells are shut off by the government. The people are scared and they are also sick and tired of being pushed around by their government officials and the people supposedly elected to represent them.
