

I agree with the analysis of the bill from Oregon Citizen Lobby

Personal Choice: Vote by Mail shirks the responsibility of voters being ID at the polls by their neighbors. Voting on the Internet only encourages illegal voting.

Fiscal Responsibility: Cheaper than running polling places Cheaper than vote by mail This was what we were told about Cover Oregon. Why would we allow the State of Oregon to promote vote by internet in light of the fact that the Secretary of State's website is down and Cover Oregon is a continuing criminal operation.

Limited Government: Vote By Mail has proven to be somewhat of a disaster for Oregon. Not only do the citizens of Oregon distrust the system, in many cases voter participation has actually gone down. All of the US is well aware of computer hacking, fraud and the lack of security on the internet. The incredible failures of the Affordable Care Act web sites, particularly in Oregon, proves that government should stay away from the internet.

Local Control: This put voting in direct control of the State and during federal elections the Nation. We already see the merciless attack on the tea party and its supporters. This eliminates the need for an elected County Officer overseeing the election process including counting.

Free Markets: I am not concerned by the loss of Free Markets, I am concerned about the loss of Individual Freedom.
