

**Construction Contractors Board
Work Plan Report**

The General Government Subcommittee recommends that the Joint Committee on Ways and Means acknowledge the receipt of a progress report on the Construction Contractors Board's Work Plan and to direct CCB to report back to the Emergency Board in May, 2014.

A budget note from the 2013 regular session directed CCB to provide a progress report on a work plan that was presented to the Subcommittee. The Acting Administrator for the CCB presented the report and noted that she and the board will be conducting a more thorough review of the agency.

The report consisted of topics such as residential continuing education reforms, residential and commercial developer licenses, new contractor workshops, development of additional IT applications, the central business registry, and the statewide disciplinary database.

The Subcommittee discussed some particulars of the report related to the future for the handyman licensure and how it may affect restoration firms.

The General Government Subcommittee recommends approval of the request.
