**Jim Bellet, Commissioner**  
Position Three

January 31, 2014

Dear Representative:

As Klamath County Commissioners, we continue to be extremely concerned for our county's ability to survive the current economic conditions plaguing the State of Oregon and our entire Nation. Often times, realigning, redefining or refining of State rules and regulations is appropriate to reduce undue economic burdens facing the citizens.

The ongoing water issues primarily affecting Klamath County are now also affecting Jackson County and have seen increased visibility at the state and national level. These issues have definite ramifications throughout the entire State of Oregon.

The 2013 water year saw the results of the Klamath Basin Adjudication for the first time and as a result local irrigators on approximately 100,000 acres of surface water irrigated ground had their water shut off. The economic impacts are having a massive effect all over the State of Oregon and the entire Pacific Northwest. The ongoing economic ripple effect has not even begun to reach its height.

The Oregon Water Resource Department has indicated that the 2014 water year we are starting into will also encompass shutting off irrigators using ground water, (wells). Because of OWRD's interpretations of rules and statutes these "citizen" irrigators now find themselves in a position of having to prove their well is not affecting surface water rather than the State proving that the individual well is affecting surface water. In other words, the citizen irrigator is guilty until they prove they are innocent, with no recourse when and if they are proven innocent.

Our District 28 Senator, Doug Whitsett, is introducing legislation that will create common sense solutions to this devastating direction.

## Klamath County Commissioners

Tom Mallams, Commissioner  
Position One

Dennis Linthicum, Commissioner  
Position Two

Jim Bellet, Commissioner  
Position Three

---

We ask for your strong support of SB 1572. (Identical to HB 4044 & 4064) This bill will clearly define standards required before shutting off irrigator's ground water. It will also hold OWRD accountable for certain economic damages if their actions are proven wrong, which will obviously strongly encourage our state agency to do their due diligence before creating unnecessary economic devastation to our local citizens.

Thank you for your consideration.

Jim Bellet  
Chair

Tom Mallams  
Vice Chair

Dennis Linthicum  
Commissioner

Upper Klamath Basin Permitted Wells Summary

12/11/2013

Prepared in answer to three requests from Senator Doug Whitsett and Representative Gail Whitsett

1. Identify wells, ownership, depth, location, and acreages for 231 permitted wells that are within 1 mile of Upper Klamath or Agency lakes or in subbasins tributary to, these lakes.
2. Identify the subset of these wells that are listed on permits that contain a scenic waterway condition.
3. Identify the subset of these wells that are within 1 mile of Klamath Lake, Agency Lake, or within 1 mile of perennial gaining reaches of streams tributary to Upper Klamath Lake.
