Re: Support for HB 2177

Common Cause supports HB 2177 to update our voter registration system.

Common Cause is a nonpartisan organization that works to safeguard and improve the democratic process. For more than 40 years, the organization has helped strengthen public participation and faith in our institutions of self-government, and has worked to ensure that government serves and is accountable to the public interest.

Common Cause supports this legislation because it offers a common sense modernization of our current voting system, serving several nonpartisan and widely shared public interests. We find several benefits particularly compelling.

- **Keeping Pace with Change** – In this increasingly busy and mobile world, it can be burdensome to keep up with all the minor bureaucratic matters of our lives. As technology advances, we've become accustomed to greater efficiency and convenience. There's no reason to make the steps to voting any more cumbersome than they need to be, especially in a country that prides itself on innovation and working smarter. As technology advances, we should advance with it.
- **Government Efficiency** – The proposed modernization is not just more efficient for voters, but also for government. By making fuller use of electronic technology, and integrating systems and information between government agencies, we save time and minimize human error, helping to keep government as efficient as possible.
- **Respecting the Right to Vote** – This measure will make it easier for more people to vote, which is a goal all of us in this room can support. Common Cause favors policy that welcomes and facilitates increased voting. We believe that broad public participation is a good thing, generally leading to better decisions and greater public confidence in those decisions.

Common Cause applauds the House Rules Committee for considering HB 2177 and urges you to vote this bill out of committee for consideration by your colleagues.
