## GREY2K USA

February 6, 2015

Grey2K USA is a 501(c)(3) that is dedicated to protecting greyhounds, eliminating greyhound racing, and adopting them out to good homes.

It was founded in 2001, and is headquartered in Massachusetts.

Since its inception, it has been instrumental in the closing of 28 racetracks around the country, and racing is now against the law in 39 states. In those states where racing still occurs, Grey2K USA works to promote transparency about the treatment of these dogs, and the number of injuries that are incurred.

The goal is to finally eliminate this cruel and inhumane practice from around the country, and to ensure it never returns.
