

CLEAN FUELS WORK

Oregon's Clean Fuels Program is **good for our jobs, economy, and health** by requiring transportation fuels to become cleaner and less carbon-intensive over time. It is a safe, reliable program for Oregon, and means more affordable and cleaner options for **fuel choice at the pump**.

A broad coalition of Oregon small and large businesses, economic development entities, consumer groups, fleets and civic leaders have signed on to support the reauthorization of Oregon's Clean Fuels Program.
