Subject: house bill 2503

Hi Chuck, since you are the Committee Administrator for the House Committee On Agriculture and Natural Resources, I am writing to voice my concerns about the many folks who want to ban lead

ammunition. There is good reason for lead ban in some cases such as water fowl protection with the requirement of steel shot for waterfowl hunting and also some concern about lead in California

Condor rehab areas. My concern is that most of the concern today seems to be in the name of banning lead ammunition for target practice and some hunting for no apparent reason other than to drive

the cost of ammunition up. I really believe that several folks behind this are motivated simply because they do not like gun ownership. I'm writing to ask you to pass on to House Committee to please

support House Bill 2503.

Thanks you. Paul Bender.
