re: House Bill 2642

Representative Huffman:

I am writing you this letter today in support of House Bill 2642, regarding Estheticians and Laser use.

I am an Esthetician currently running a non-ablative laser. I have received extended and advanced training with my managing Physician, as well as being Certified from the National Laser Training Institute. These trainings have educated me in Safety Practices regarding these lasers and also allows me to extend my practice as an Esthetician.

If this bill passes, it will effect over 16,000 Estheticians in the State of Oregon. It will allow them to continue to make a living viable wage. If this bill does not pass, it will greatly effect myself and other Estheticians in our careers as well as the business in which I work.

Thank you for your attention to this matter. Please feel free to contact me with any questions or further comments.

Sincerely,

Angie Herriges

Licensed Esthetician
