

HB 2642

1. Needed to establish safe standards for esthetic use of LLRP devices to protect the public and the technician using the device. These standards should include:
 - a. Appropriate training both theory and hands on
 - b. Training specific to the device in use
 - c. Written protocols for safe use of every device in use and for all procedure being offered in a facility.
2. This is not needed for other low energy devices, modalities or esthetic services as those are already covered by the Health Licensing Office.

Submitted by:

Judith Culp: Licensed esthetician in Oregon since 1980; NCEA Certified, Licensed Master Esthetician in WA; Contributing Author of Milady's Standard Esthetics Advanced First and Second Editions. Basic and Advanced Esthetics School owner and instructor 2003-2013 and now offering continuing education for estheticians at the Advanced level
