Subject: atv use

As an atv user and avid rider, I am in favor of the use of atvs on public streets in smaller towns. I have been to several small towns in idaho that allow this and it also makes sense from an invironmental point of view. The atv will have one or two cylinders while automobiles will have four cylinders up to eight cylinders. Not hard to see the difference here. I also think there should be a license required on the atv and by the operator just as requirements are now to drive on public streets. Thankyou, Cliff Asmussen,P O Box 816, Burns, Oregon 97720
