

PRELIMINARY STAFF MEASURE SUMMARY**CARRIER:**

Senate Committee on Senate Health Care

REVENUE: No revenue impact**FISCAL: May have fiscal impact, statement not yet issued****Action:****Vote:****Yeas:****Nays:****Exc.:****Prepared By:** Zena Rockowitz, Administrator**Meeting Dates:** 2/23

WHAT THE MEASURE DOES: Appropriates \$1,400,000 to the Oregon Health Authority for the biennium beginning July 1, 2015 to establish 11 new school based health centers. Declares emergency, effective on passage.

ISSUES DISCUSSED:**EFFECT OF COMMITTEE AMENDMENT:**

BACKGROUND: School-Based Health Centers (SBHC) have existed in Oregon since 1986 to provide physical, mental and preventive health services for children on school grounds. Primary care providers, mental health, and dental professionals are available to students. ORS 413.225 recognizes SBHC as part of the safety net system of care.

The Oregon Health Authority reports that as of January 2015, there are 68 certified SBHCs and nine planning sites. An additional eight more SBHCs will open during 2015. For the 2013-2014 year, services were available to 52,466 students in 20 counties. SBHCs served 23,797 students of which 43 percent of children were on Medicaid, 17 percent on private insurance, 4 percent on another public insurance, and 36 percent were on no insurance (or unknown).

In 2013, House Bill 2445 provided \$3.9 million in additional funding to SBHCs. The law increased the 2013-2015 funding formula from its 2009 levels. Counties with one certified SBHC receive \$60,000 per year and counties with an additional certified SBHC receive \$53,000 per year per center. The Local Public Health Authority in each county provides the funds to support SBHCs. The specific expenditure of the funds is a decision between the local public health authority and its partners. In the 2013-2015 biennium the SBHC State Planning Office awarded 14 communities, across 11 counties, planning grants for SBHCs.

The Oregon Health Authority interviewed 26 counties regarding their interest in planning new SBHCs. Of those interviews, 11 indicated they would be “very interested” and nine indicated they would be “somewhat interested” for the upcoming biennium. These counties projected a total of 22–25 potential new SBHCs.
