

# Oregon Smoking Prevalence

According to the U.S. Centers for Disease Control and Prevention (CDC), smoking prevalence in Oregon is less than the average for the rest of the country.

- 17.3 percent of Oregon adults smoke
  - 18.7 percent of males smoke
  - 16 percent of females smoke
- 19 percent of U.S. adults smoke

## Cigarette Use (Adults), 2013

Source: Behavioral Risk Factor Surveillance System (BRFSS)

The majority of those in Oregon who are affected by cigarette excise taxes earn less than \$25,000 per year.

<b>Oregon Tobacco Facts 2013: Adult Cigarette Smoking</b>			
<b>Adult cigarette smoking by household income, 2010 through 2012</b>			
Income	2010 Prevalence (%)	2011 Prevalence (%)	2012 Prevalence (%)
Less than \$15,000	41.7	35.9	31.4
\$15,000 - \$24,999	29.7	32.8	26.4
\$25,000 - \$49,999	21.0	20.7	19.7
\$50,000 or more	11.1	10.1	11.0

**Notes:**

- Adult prevalence (BRFSS) data include both land lines and cell phones.
- The results above cannot be compared with results from 2000 to 2009. The populations and methods are different.
- The results are age-adjusted.

**Data Source:**

Oregon Behavioral Risk Factor Surveillance System (BRFSS). See "Oregon Tobacco Facts Data Sources and Statistical Methods."

A 2011 study by the CDC showed that workers in mining, food services and construction had smoking prevalence rates that were more than double the rates found in professional services such as public administration, finance, management and education.<sup>[1]</sup>

<sup>[1]</sup> "Tobacco Expenditures By Education, Occupation and Age," Consumer Expenditure Survey Anthology, Bureau of Labor Statistics, 2005. See also, "Current Cigarette Smoking Prevalence Among Working Adults --- 2004-2010," MMWR, CDC, September 30, 2011.

The percentage of smokers who use Oregon Health Plan (OHP) or Medicaid has declined for three years in a row, but the rate is still twice that of the overall percentage of smokers in Oregon.

## Oregon Tobacco Facts 2013: Adult Cigarette Smoking

### Adult cigarette smoking by health insurance status, 2010 through 2012

Health Insurance Status	2010	2011	2012
	Prevalence (%)	Prevalence (%)	Prevalence (%)
Oregon Health Plan (OHP) / Medicaid	41.7	37.8	35.9
Any health insurance other than OHP	13.2	14.9	13.1
No health insurance	36.2	33.9	29.3

**Notes:**

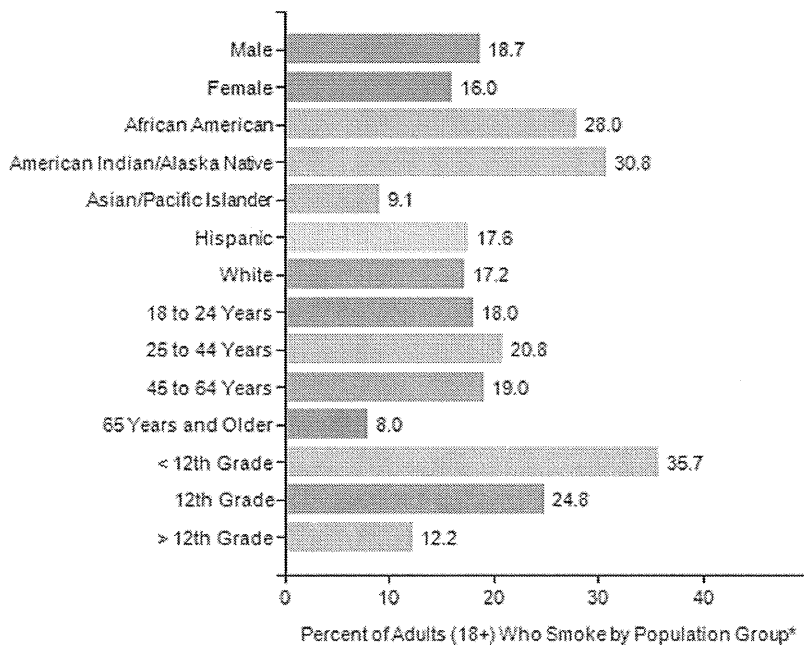

- Adult prevalence (BRFSS) data include both land lines and cell phones.
- The results above cannot be compared with results from 2000 to 2009. The populations and methods are different.
- The results are age-adjusted.

**Data Source:**

Oregon Behavioral Risk Factor Surveillance System (BRFSS). See "Oregon Tobacco Facts Data Sources and Statistical Methods."

In Oregon, the largest smoking prevalence exists in the minority community and those who are ages 18 to 64.

### Current Smoking (Adults), 2013

**Note:** \* Estimates for education are based on adults aged 20 years and older. Estimates for racial/ethnic groups are based on combined 2012 and 2013 data.
