

SB 86 - firearms training facility I urge you to **vote YES on SB 86**. Training is a must on any new learning experience. And, for firearms, practice is good.

As a child my father taught me how to handle a weapon and how dangerous they can be in the hands of someone who does not know or respect a weapon. Then in high school I had the great opportunity to take junior rifleman classes. That was back in 1956!! Today I have great respect and appreciation for any and all firearms.

SB 385 - prohibits weapons in municipal court..... I urge you to **vote NO on SB 385**. We have seen on television cases where someone goes off shift during a court session and people are killed or harmed. If there was a canceled carry person in the court they may have been able to stop the situation. Our right to carry a gun is the most fundamental of rights protected by our constitution. We have no indicators that tell us a person has a mental problem so how are we to protect ourselves from these types of people.
