To Whom it may Concern

Regarding EI/ECSE

Greetings! I am a mother of twins, and they both receive services from EI/ECSE. My daughter has Sensory Processing Disorder, Hypotonia and Hypermobility. Her brother has mild developmental delay.

EI/ECSE has been a pot of gold for my twins! My daughter has been receiving services since she was 6 months old with PT, OT, Behavior and Speech Therapy. Without these services, her development would have suffered greatly. They have also taught me how to teach her to be and do the best that she can.

My son has been receiving services since the beginning of this school year. They have discovered his learning "niche," in a setting that has made him feel safe to explore and be curious. I, personally, believe that children need to be taught in the way they are able to learn, and EI/ECSE has provided this for my son.

Increased funding for EI/ECSE services will mean more support to more children to be able to learn in a way that meets their specific needs. All kids deserve the opportunity to be the best that they can be!

Thank You!

Chanda Trujillo
