For Klamath County School District, at this time I would be against HB2762 banning the use of polystyrene trays. In a district already strapped for money, if we could not use the polystyrene trays it would be at a minimum an additional expense to the District of over \$13,000 per year. As we do not have a licensed recycling facility in Klamath, why should we spend \$13,000 more money for compostable trays to take up more room in trash liners to be put in a landfill?

Thanks, Chris
