

I am writing you in reference to SB875 (mandated Adrenal Insufficiency Syndrome training).

As a mother and an educator, I would urge you to move this bill forward. As a mother, I understand the absolute need to know my child is safe at school and would receive life saving treatment if needed. As an educator, I would not hesitate to be trained to save a child's life. In fact, it's my duty to do so.

I urge you to consider this bill. It's what you would want if your, or any child was at risk.
