

Dear Senator Monnes Anderson and members of the Senate Health Committee.

I am writing in support of SB874. I am a family member to a young woman who has adrenal insufficiency and I feel that she should be able to get the life saving treatment needed in an adrenal crisis. I find it reprehensible to imagine her dying or becoming permanently disabled for lack of a \$10 injection. EMS and ER personnel must and need to be trained in the signs and symptoms of adrenal insufficiency. Please pass this bill, it could save a life!

Sincerely,

Jackie Riggs
