

Dear Senator Monnes Anderson and members of the Senate Health Committee,

We are writing in support of SB874.

One of our nieces lives in Oregon and has adrenal insufficiency. As long as Oregon does not have protocols in place on adrenal insufficiency, her life and those of many others in Oregon are at risk. Our state has such protocols and I fail to understand why Oregon does not. All that is required to save lives is to provide ER departments and EMTs with basic AI training and a \$10 injection.

We understand there has been resistance to this simple, inexpensive, and life saving bill. We find this both puzzling and sad.

Please pass this bill!

Sincerely,

Andrew & Karin Smith

Sudbury, MA
