

Proposed Content for Amendment

	Subject	Reason	Action Type	Section	Solution
1	Age Verification Equipment	OLCC would like authority to require the use of age verification equipment in order to prevent sales to minors.	Technical Fix		Allow OLCC discretion to require age verification equipment.
2	Bonding	Measure 91 does not require marijuana producers to have a bond to cover their tax obligations	Technical Fix		Allow OLCC discretion to require producers to purchase a bond to cover tax obligations.
3	Civil Penalty Authority	With uncertainty surrounding the kinds of potential compliance problems that will be faced during implementation, ready authority to utilize civil penalties to gain compliance would provide flexibility as the agency encounters unanticipated issues.	Technical Fix	30(2)	Match OLCC's alcohol civil penalty authority.

	Subject	Reason	Action Type	Section	Solution
4	Confiscation of Marijuana	OLCC may need to confiscate or seize limited amounts of marijuana to establish violations. Examples may include: in the case of minor decoy operations; to verify origin of product; to hold product that is in excess of recorded amounts.	Technical Fix	7(5)	Amend section 7(5) to make clear that OLCC can possess for purposes related to powers and duties, including seizure and sale as in ORS 473.100 and 473.110.
5	Fees	There is no fee authority in Measure 91.	Technical Fix		Allow the OLCC to impose fees beyond the application fee contemplated in Measure 91 to cover such issues as label approvals and changes in location.
6	Insurance	It is the OLCC's intent that the business practices of its licensees match practices generally followed within the business community, the OLCC should have an ability to require liability protection.	Technical Fix		Create provisions that give OLCC the discretion to require marijuana licensees to carry insurance.

	Subject	Reason	Action Type	Section	Solution
7	Investigatory Tools	The issuance of subpoenas compel production of documents or testimony. They are normal regulatory tools necessary for the OLCC to vigorously regulate marijuana just as it does alcohol. These tools are used to determine facts, determine compliance or charges of violations, and to provide evidence of violations for adjudication and sanctions.	Technical Fix	7(2)	Create provisions parallel with ORS 471.760OLCC to issue subpoenas, compel production of documents and/or testimony.
8	Lab Testing License	There is no license for labs to hold marijuana and test it for other licensees. This license is necessary to set quality control and health and safety standards.	Technical Fix		Create a lab testing license. OLCC will then set the testing standards by rule.

	Subject	Reason	Action Type	Section	Solution
9	Laboratory Certification	There is widespread agreement on the deficiencies of labs testing marijuana products for potency, solvents, mold, pesticides and other agents related to public health and safety. A clear testing standard and independent lab certification should be required by OLCC.	Technical Fix		Establish a third party lab certification process.
10	Origin of Seeds & Plants	Since seeds, cuttings, or small or mature plants are necessary for establishing a licensed facility, and the legislature should want to clarify the means by which initial grow stock is established for a regulated grow. Medical card grow inventory and cuttings legally regulated by the State of Oregon may be made available to those wishing to establish recreational grows.	Technical Fix		Statutory direction for seed and plant origins.

	Subject	Reason	Action Type	Section	Solution
11	Peace Office Authority	Providing the OLCC with equivalent Peace Officer Authority would allow the Commission to utilize the same discretion it has for enforcement of administrative and criminal violations of alcohol law. This would create potential efficiencies as existing experienced personnel could be cross trained to regulate both alcohol and marijuana.	Technical Fix		Create peace officer authority over marijuana licensees similar to what is in ORS 471.775.

	Subject	Reason	Action Type	Section	Solution
12	Possession of Marijuana by Government Entities	ODA, OHA, and DEQ may all have a need to possess amounts of marijuana for compliance, and enforcement. There are no provisions that would protect individuals from criminal laws related to possession. State agencies with a need to possess limited amounts of marijuana for regulatory compliance should be authorized to do so. To effect this ability, protection of the regulatory workforce from violation of criminal laws related to possession is a practical step.	Technical Fix		Add a statutory section that allows any government agency with some jurisdiction over marijuana licensees or that is involved in the testing of marijuana an exception from criminal laws related to marijuana.

	Subject	Reason	Action Type	Section	Solution
13	Presenting Identification for Age	One of the most important responsibilities of the OLCC will be to prevent minors from gaining access to marijuana, the OLCC should have broad authority to require necessary I.D. check regulations to deny entry to any licensed location. Sec 16 implies that a retailer only has to check ID if there is a question about a person's age. OLCC would like the ability to mandate checking ID if it deems necessary.	Technical Fix	16	Amend this Section to allow OLCC to set by rule when IDs will be checked.
14	Processing Licenses	The OLCC would like to be able to develop license sub-categories for processors since this category is inclusive of diverse processing activities, some of which are increasingly complex and pose added regulatory challenges.	Technical Fix	5(26),18	Allow OLCC to create three sub-categories of processor licenses: 1) Packaging; 2) Concentrates; and 3) Manufactured Products.
15	Producer Packaging for Sale	Producers should be able to package bulk product for retail sale without holding an additional processor license	Technical Fix	5(27)	Allow OLCC to define packaging at the producer level or incorporate certain packaging privileges via an endorsement to the producer license.

	Subject	Reason	Action Type	Section	Solution
16	Regulatory Authority	The OLCC has operated with broad authority to protect public health and safety in alcohol regulation and has use that authority responsibly, providing similar statutory authority for the protection of the public in marijuana regulation would be a prudent and consistent.	Technical Fix		Give OLCC authority to adopt rules to protect public health and safety.
17	Retail Packaging for Sale	Retail outlets may wish to receive bulk flower product from a producer and package that into individual packages without having to hold and additional processor license.	Technical Fix		Allow OLCC discretion to define packaging at the retail level or incorporate certain packaging privileges via an endorsement to the retail license.

	Subject	Reason	Action Type	Section	Solution
18	Seed to Sale Tracking System	OLCC intends to implement an electronic marijuana tracking system that uses radio frequency tracking technology to monitor the growing, processing, wholesaling, retailing and transportation of marijuana products in the recreational system to comply U.S. Department of Justice legal guidelines. Authorization of this system would make clear state law affirms this implementation choice.	Technical Fix		Grant specific authority for use of seed to sale tracking for all license types and that the system will be available to transportation, local government, and state government in order to account for marijuana they may encounter in the scope of their duties.
19	Server Permits	Servers of alcohol hold permits issued by the OLCC and must pass a background check and take mandatory education. Also, permitted servers are held accountable for liquor law violations. Issues have been raised regarding whether employees of marijuana licensees should be similarly licensed.	Technical Fix		Require employees of marijuana licenses to hold a permit as a condition of employment.

	Subject	Reason	Action Type	Section	Solution
20	Electronic Fund Transfer	OLCC may need authority to require electronic fund transfer for the payment of taxes, application fees and license fees.	Technical Fix		Allow OLCC discretion to require electronic fund transfer payment.
21	1000 Feet of a School	As written, the OLCC could approve license applications within 1000 feet of a school but the business would violate Criminal Law. While OLCC could manage this issue by rule, cleaning up the statutes would provide policy clarity.	Technical Fix	7, 29(2)(a)	Specify no licensees within 1000 feet of a school.
22	Age Discrimination	Being able to insure that minors do not access marijuana is of the highest priority for OLCC. There are statutes that make it clear that it is not age discrimination to enforce age restrictions against minors consuming alcohol or frequenting a place that serves alcohol or liquor. The same should be made clear for enforcing the state's marijuana age restrictions.	Technical Fix		Add parallel provisions to ORS 659A.403(2) and 659A.409.

	Subject	Reason	Action Type	Section	Solution
23	Definition of Extract/Concentrates	It is common practice for extracts to be made with vegetable glycerin or other non-toxic solvents and the regulation of extracts should cover the variation of industry practices in creating extracts. Given definition of "extract" not clear where a concentrate made with vegetable glycerin or other non-toxic solvents would fall. The statute should be changed to include these as marijuana products.	Technical Fix	5(19)	Expand definition of extract to include vegetable glycerin or other non-toxic solvents and allow the OLCC to regulate these and other extract processes.
24	Definition of Leaves	The measure only taxes flowers, leaves and immature plants. Definition of flower and immature plant is clear, definition of leaves is not. Leaves should be defined as everything that is not a flower or immature plant, exclusive of unusable waste material. This will reduce confusion and allow for effective tax collections.	Technical Fix	33	Clarify definition of leaves to be everything that is not flower or immature plant, exclusive of unusable waste material.

	Subject	Reason	Action Type	Section	Solution
25	Definition of Marijuana	Marijuana has been re-classified and is not in the plant family Moraceae. Further, the definition of marijuana should be the same as that in the Oregon Medical Marijuana Program (OMMP).	Technical Fix	5(12)(a)	Amend 5(12)(a) to read: "Marijuana" means all parts of the plant genus Cannabis within the plant family Cannabaceae , whether growing or not, other than marijuana extracts.
26	Definition of School	The definition of school has been a problem related to other state licensing activities, for the purposes of siting recreational marijuana licensees, OLCC believes a clear definition of "school" as a K-12 school with mandatory attendance would provide certainty for the licensing process.	Technical Fix	5	Add definition. K-12 with mandatory attendance.
27	Fingerprints & Background Checks	Without the authority to obtain fingerprints, background checks will not conclusively prove identity and OLCC may be limited from accessing certain criminal history data.	Technical Fix		Grant specific authority to allow OLCC to obtain fingerprints from applicants.

	Subject	Reason	Action Type	Section	Solution
28	Immature Plant Definition	The Measure and the OMMP define immature plant differently. There should be no distinction in the definition of immature plants between the medical and recreational program.	Technical Fix	5(9)(29)	Use the medical definition of immature plants.
29	Imposition of Tax Limitation	This raises concerns about tax collections after 36 months.	Technical Fix	34(3)	Clarify that tax can not be imposed after 36 months. (similar language used in ORS 473.060(3)).
30	License Renewal	The OLCC would like to have the flexibility to create an even work flow for license renewals. This will prevent large peaks of renewals following implementation. Generally, the license renewal should be due one calendar year from the date of issuance.	Technical Fix	26	Amend Section 26 to say that licenses are issued for a period of one year.
31	Licensee Possession Limits	The measure exempts individuals who hold marijuana licenses from certain marijuana offenses, but does not tie this exemption to operation of the licensed business.	Technical Fix	79(6)	Clarify that Section 79(6) only applies to licensees when they are exercising privileges under their license.

	Subject	Reason	Action Type	Section	Solution
32	Minor Attempts to Purchase	Sec 49 reads "A person under 21 years of age may not attempt to purchase marijuana items." Similar provision in chapter 471 states a minor may not, "attempt to purchase, purchase or acquire marijuana items."	Technical Fix	49	Revise section in order to make it consistent with standards for alcoholic beverages.
33	ODOT Definition	ODOT is improperly referred to in the Measure as ODA and needs to be changed to ODOT.	Technical Fix	49(5)	Spell out ODOT rather than use "department."
34	Tax Collection	The measure is not clear that the OLCC has the authority to enforce liens for delinquent taxes. OLCC believes it should have strong fiduciary powers to collect taxes owed and to do so in a timely manner.	Technical Fix	37	Create authority for OLCC to enforce liens for delinquent taxes.

	Subject	Reason	Action Type	Section	Solution
35	Tax Deductions	Act permits tax deductions for business expenses for production and sale of things like meth, cocaine. The Legislature should consult with the Oregon Department of Revenue on the treatment of tax deductions for business expenses as they relates to income earned in the marijuana industry.	Technical Fix	71, 74	Limit tax deductions to business expenses connected with marijuana production and sale permitted under the Act; retain prohibition for all other deductions disallowed under IRC Section 280E.
36	Tax Records Retention	Records retention period shorter than time period for revenue to do tax audit. Consult with the Department of Revenue recommendation concerning the maintenance of records for the purposes of tax audits.	Technical Fix	39	Make records retention period longer.
