

Dear Senator Monnes Anderson and members of the Senate Health Committee. I am writing in support of SB874

I am a friend of an Oregonian who has a child with adrenal insufficiency and believe that she should be able to get the life saving treatment needed in an adrenal crisis. It is reprehensible to imagine my friend's daughter dying or becoming permanently disabled for lack of a \$10 injection. EMS and ER personnel must be trained in the signs and symptoms of adrenal insufficiency. Please pass this bill, it could save a life!

Sincerely,

Susan Coleman, Eugene
