

Dear Senator Monnes Anderson and members of the Senate Health Committee. I am writing in support of SB874

One of my soccer teammates has adrenal insufficiency. I was shocked to find out that there are no protocols in Oregon that would enable EMTs to inject her life saving medication during a crisis or that the ER departments are not trained in how to help her either. Our soccer team plays games all over the state and the fact that there are no protocols is frightening. This young woman and others with adrenal insufficiency should be able to get the life saving treatment needed in an adrenal crisis. EMS and ER personnel must be trained in the signs and symptoms of adrenal insufficiency. Please pass this bill, it could save her life!

Sincerely,

Sophia Adams, Eugene
