

Dear Senator Monnes Anderson and members of the Senate Health Committee.

I am writing in support of SB874

My sister who lives in Eugene has adrenal insufficiency. It's horrible that Oregon has no protocols that would enable EMTs to inject her life saving medication during a crisis. Even the ER departments are not trained in how to help her. My sister could die just because there is no protocol that allows a simple \$10 injection! That's not right!

EMS and ER personnel must be trained in the signs and symptoms of adrenal insufficiency. Please pass this bill, it could save my sister!

Sincerely,  
Tiffany Garboden  
Springfield, Oregon
