Subject: HB 3429 & 3430 testimony 3/26/2015

I'm Clair Klock from Corbett, OR and I urge support of HB 3429 and 3430. I would like you to know that I have in the past and still do use agricultural and forest chemicals, so am well aware of the important contribution these compounds make in the production of both agricultural and forest products

These bills are important to restore confidence that state agencies are acting in the best interest of the public and not for the best interest of the timber and agri-chemical industries.

It also would provide for a standard operating procedure to determine if complaints are warranted through chemical testing and evaluation by a trained technician.

Thank you for your time.
