

To the supporters of SB 941 and SB 525:

Shame on all of you who let non-Oregonians like Bloomberg interfere with the voices of the people who elected you. Your job is to represent Oregonians with legislation that is rational, reasonable, and not ideologue rhetoric. Neither SB 941 or SB 525 are rational, neither provide any more protections than what already exist, and both give excessive, unlawful, and even redundant and unconstitutional powers to the state. These bills are purely ideological in nature, and are being pushed through the legislature without the vote of the people. You are expected to weigh bills on their merit, efficacy, and the impact on the people of this state, not by what non-Oregonian ideologues lobby and pay for. As well, you are expected to follow impartially the protocols of the state legislative process, and not play favorites or politics in order to circumvent the desires of the constituents as you are our proxy representatives in the state government.

Considering SB 941 and SB 525 on their actual impact and necessity, in an impartial, informed, and big picture manner may be well outside your ideological agenda, as is regularly demonstrated. To have a government that isn't beholden to preserving natural and constitutional rights, while providing real, effective support to those who are vulnerable and prosecuting actual criminals, again demonstrates how broken our state's and nation's politicians are.

Are you the people's representatives, or are you such ideological and myopic tools that you will make poor decisions which negatively effects all Oregonians, and injure everyone's civil rights so that you can be a false champions for a day, and yet losers for history?

Your behavior is an example as to why people are losing faith in government.
