

Dear House Committee on Health Care,

I urge you to act now to eliminate diesel particulate pollution in Oregon. The air we breathe should be our highest priority, and the time to act is now.

I live in Portland, in Cathedral Park, and my partner lives in Lair Hill. Both of our neighborhoods have deplorable air quality, some of the worst in the nation, due in part to the many diesel trucks passing through. This bill is one easy way to improve our air quality and our health significantly. Please adopt it!
