

I urge a not-pass on this bill either with or without dash 1 or dash 3. Where is "Due Process" in this expansion of current law? It's bad enough that it doesn't exist in what is already on the books for accused felons or for "Qualifying Misdemeanor Crime". That seems to be a case of prejudging people without due process. I am aware that attorneys think themselves to be wordsmith who can make any word mean something other than what is intended and defined. It really is tiresome and frustrating to hear of people who work in this manner. I have even heard of an Oregon Judge who decided on his own that "Must" really means "May" and once again we have an example of making definitions up as we go along. You don't want to know what my definition of shyster is. Sincerely, Dale Casey, Medford, Oregon.

P.S. This is just one more example of "Grandstanding".
