

To the Judiciary Committee

SB 525 expands the definition of "domestic violence" well beyond what any reasonable person would determine it to be; **please remove this provision.**

Right now, judges have virtually unlimited discretion to take away firearm's rights from people who have not been accused of, let alone convicted of, any crime. **The proposed "dash 1" amendment would correct this often abused activity** and allow an accused person to seek due process. **I urge you to support this amendment if you move this bill forward.**

Sincerely,
James Kirkpatrick
