

Sen. Prozanski; I am writing in strong objection to your sponsored bill for additional background checks in Oregon. I believe this is promoted in the misconceived beliefs that this will reduce criminal or incompetent individuals from buying these guns. From my years of owning guns and watching the industry I believe we really need more enforcement \$ for our police rather than more laws. The police already have plenty of laws on the books to enforce these problems. Also, I have a lot of concern that most less populated, rural counties, districts and cities, disagree with your bill but because the state population is centered in a few urban cities and counties, that have far different beliefs about this action, you are able to disregard our rights and desires. Do not impose your desires on those of us who do not feel the same way.

Please remove your name from this bill. My representative and senator already disagree with this bill.
