

Do any of the legislative sponsors think that this legislation will prevent a prohibited person from acquiring a firearm? The answer is no. Criminals will continue to get guns from straw buyers, stealing, or illegal gun sales just as they are doing today.

It is already illegal for prohibited persons to have, or to sell to a prohibited person.

The legislation further expands the list of prohibited persons to include some people that haven't even been convicted of a crime.

I urge a NO vote on this misguided measure.

Laws do not prevent crime, they define crime and this legislation has the potential to criminalize many law abiding gun owners.
