

To whom it may concern:

I strongly support legalization and passage of this bill to allow motorcyclists and moped riders the ability to safely move thru traffic when it is at a standstill or bogged down.

This has been legal for decades in California and works well. For too long motorcyclists and scooter owners have been ignored in the regional transportation discussion. Its an all or nothing mentality of either mass transit, Bicycles or cars.

2 wheeled motorized transport is the norm in many countries and its simply not given its due here. I comutte on a regular basis on a motorcycle and when traffic is frequently slowed to a crawl, my motorcycle begins to over heat. I need to be able to move safely along and in reality it is beneficial to traffic and congestion to be able to bypass or pass thru traffic congestion. By opening up this mode of travel, It frees the area of congestion, and lessens the environmental impact.

Please pass this bill immediately,

Sincerly,

Doug Towsley. HD51
