

My Representatives a Senators,

I ask that You oppose SB941. Laws do not stop criminals from committing crimes, hence they are criminals. I as a supporter of the Second Amendment Rights provided in the Constitution strongly oppose to selling guns to criminals, As a law abiding citizen if I were to suspect someone I were to sell a firearm to may be a criminal or were to know of said person being a criminal I could already use the background system in place. Either if or not SB941 passes what will stop a criminal from breaking this law? Where will the enforcement come from? Where will the money for the enforcement come from? This is yet another weight upon our society it not need to bear. Nor do we wish to support its implementation into law, It prohibits loans, storage, hobby work and many other simple rights You have No Right to take away. Honor Your Oaths.

Law and Law Enforcement Needs Reform but This isn't it. Hyped Emotion, Inflated Stats and Pressure from people who are wanting control are not the right reasons for new legislature. From what I've known in My life is that criminals don't attain firearms from legal means, many fail to see what SB941 would accomplish. The black market is where criminals who wish to attain firearms mainly go for them, or they steal them. This Bill will not stop that from happening.

Sincerely,

Dylan LoCicero
