

Hi my name is Glenn Hadley I'm 65 years old and have had firearms since I was 12 years old I take offense at this bill that is being moved so fast that you are not letting the people comment on such a shabby piece of legislature it is utterly disgusting to say the least you are not addressing anything except to make a lot of people criminals anyone ho votes for this bill should be ran out of town on a rail If you wanted to do anything you should follow the laws that are already on the books. This law is going to be just like the cell phone bill that nobody cares about this government that we have should try doing some real work that does some good  
Thankyou
