I would like my testimony recorded in relation to SB 941.

First, the established laws regulating new Legislation have been ignored. We have an unconstitutional governing body establishing unconstitutional rules.

Second, every day in Oregon hundreds of weapons are exchanged by criminals, gang members and people who never took time to read the statues and laws. This legislation does nothing towards addressing this situation.

Third, you are making it so difficult for a law abiding citizen to obtain a defensive weapon that these people will simply skirt this law. You are writing a law that will create criminals from law abiding citizens.

Forth, local law enforcement can not carry out all of the task that Legislators have loaded on them. This is like driving and talking on a cell phone. That is not even being enforced. Law enforcement now labels this type of legislation as "Bad Laws" and do not even enforce them. Who will pay for the attempt to enforce this type of law?

This is obviously a "gun grabbing" scheme being cooked up by a handful of out of control Legislators with an "agenda".

I would request that this Legislation be tabled until a vote of "We the People" can be taken.
