

Jeff Rhoades.

I have testimony on SB 941.

1. I object to the bill being rushed through the process for the only reason to keep it from the public and not allowing due process for the public to speak on this bill. There is a legislative process and this rush is only denying Oregonians their right to comment on the bill.

2. This law only adds extra burden to 99.999% of the law abiding citizens.

People who support this law fail to understand that the only people willing to follow it are not the people we worry about.

3. This law does not enhance public safety. There are enough laws on the books already and yet people still break them. Why would adding this law, which just hurts law abiding people, going to fix the fact that those that wish to do harm are still going to break the law(s). This law does not help at all the people have can pass a back ground check but wish to do harm.

4. who is going to pay for the extra costs with all these pointless back ground checks? Education is already screaming for money and instead of giving them money that they need, this law is created and will just waste it.

As an independent voter that leans to the left, I will start taking an active role against those that support this bill. I may not be able to run against these people or get them thrown out of their office, but I can and will support the people that are running against them in future elections. In the end, money talks and those people that waste tax payers money on something that does not enhance public safety will not get my political donations or time.

Jason Lovell
