

SB - 941 is a joke and you know this; it is simply more government over grab by the super majority. We have laws on the books that work just fine and we do not have a problem in Oregon, don't create one. The fact this is getting rammed through with so little time for people to react simply shows you know what your doing is wrong.

Oregon and the US are starting to look more and more little Germany in the mid '1930/ go do something constructive.
